

MASS TORTS

We serve as national and state counsel in mass tort litigation and the defense of manufacturers, retailers and other parties in claims and suits involving a diverse range of products. We represent clients in claims involving personal injury, commercial losses, property damage and environmental response costs, in class actions and other complex litigation, in state and federal courts around the country. Our attorneys are well aware of the public-relations impact of mass tort cases. We advise clients on community and media relations, information management, document control, and relations with law enforcement and regulatory agencies.

Our lawyers also provide proactive, risk-management guidance and liability audits with respect to manufacturer testing, recordkeeping, marketing, product labeling, regulatory controls and other areas. These audits enable clients to avoid exposure, limit risks and minimize the impact of potential claims and suits.
