

INTELLECTUAL PROPERTY

Bracewell's top-ranked intellectual property attorneys are intimately familiar with the issues facing our clients and the industries in which they do business. A significant majority of our attorneys have advanced degrees in biotechnology, chemistry, pharmacology and physics, as well as in chemical, electrical and mechanical engineering. Prior to joining the firm, many of our lawyers built highly successful careers at research institutions, regulatory agencies, and major public and private companies operating in the cleantech, energy, finance, high-technology, lifesciences and manufacturing sectors.

This combination of technical, business and legal experience has provided us with an in-depth, first-hand understanding of the needs of our clients. Our seasoned attorneys provide comprehensive, trusted legal counsel in all aspects of intellectual property law, including patent prosecution and enforcement, licensing, technology transfers and joint venture ag
